

EAG Quality

The world leader in surface analysis is here to support you

As a member of Evans Analytical Group, we have a wide range of knowledge to supply, advise and actively support our customers. We respond to all needs promptly using first-class global technology.

We are respond to the high expectation of semiconductor and electric material with EAG quality.

High accuracy and quick turnaround

- ◎Depth profile of O, C, B, P and As in Si substrate
- ◎Depth profile of Ge, C, O and B in Si/SiGe structure
- ◎GaAs, InP, AlGaAs and 4 elements compound
- ◎GaN, SiC, ZnSe, ZnO and wide bandgap semiconductors
- [New] High sensitivity analysis in SiC
(Detection limit of Nitrogen; $8e14$ Atoms/cm³)
- [New] High sensitivity analysis of metal impurities in SOI samples

Also, high-accuracy analyses by RBS, HFS, PIXE, and NRA

- ◎Measurement of CoSi, NiSi, TiN, TaN, and SiON, etc.
- ◎Measurement of compound semiconductors (III-V, III-N, II-VI, and SiGe)
- ◎Measurement of low-potassium and high-potassium materials
- ◎Measurement of superconductor materials and optical thin membranes

We supply world-class analytical services from EAG in Japan
